

Loren Sands–Ramshaw

Software engineer with 13 years of experience looking for a principal or staff position. Quick learner, great communicator, and clean coder. Good at writing, Googling, debugging, keyboard shortcuts, and getting things done.

EXPERIENCE

Author — *The GraphQL Guide*

2016 - 2021

Coauthored with John Resig an extensive book on GraphQL and its use with Node, React, React Native, Vue, Android, and iOS. Built a web app for purchasing and reading the book. Ran the business, including support, marketing, and OSS maintenance. graphql.guide

Consultant

2014 - 2020

Created, fixed, and added features to various web and mobile apps. Worked with many JavaScript environments and libraries, including React, Node, React Native, Cordova, Firebase, Amplify, AppSync, Cypress, Next.js, and Meteor.

CTO — *Parlay Technology, Inc.*

2014 - 2016

Built a cross-platform mobile app for challenging your friends and making predictions. Notable features included real-time updates, P2P payments (USD and BTC), and CSS animations. parlaywith.me

Global Network Vulnerability Analyst — NSA

2010 - 2012

Developed apps with Rails, Backbone, CoffeeScript, and Android. Computer Network Operations Development Program. TS//SCI clearance. Wrote a #1 Hacker News essay on my experience.

EDUCATION

National Cryptologic School

2010 - 2012

Studied network security, web application security, computer network operations, malware analysis, assembly language, network programming, C programming, Linux and Windows kernels, and cryptography.

Dartmouth College — *B.A. in Computer Science*

2006 - 2010

Magna cum laude. Honors thesis. Java, C, Scheme, Haskell, Algorithms, Software Design, Computational Neuroscience, Networking, Security, Artificial Intelligence, Computer Architecture, Theory of Computation.
